1. Type your search inquiry into the Discovery search box on the LSU Library homepage.
2. After you have filtered through your results, select the article you want.
3. Select “Cite” on the right hand side of the page.
4. Scroll down until you see the appropriate citation style. You can now copy and paste it into your paper.

Remember: These citations ARE NOT always 100% correct. It is best if you take the time to look up the proper citation style or ask your professor what they prefer and compare it to the citation that is generated. Many times you will see that there is unnecessary information added. This is just a great STARTING place for those who need help with citations.
